

Courses Available on LMS for Employees

Obsidian HR and isolved University

SCORM, or Sharable Content Object Reference Model, is a set of standards and technical specifications that enables e-learning course creators to create courses and share them across multiple platforms. isolved's Learning Management System (LMS) meets the SCORM standards and is called isolved University.

Available Courses

With an activated LMS subscription, you can take a plethora of courses that should enhance your employee performance. Your employer may direct you to specific courses, or you may take the initiative to complete courses based on your needs. The accompanying document lists the current courses available to you through isolved University, which can be accessed through your isolved account. If you do not have an active LMS subscription and are interested in the thousands of topics you can be trained on and want to learn more, please send your inquiry to help@obsidianhr.com.
